Android App of the Day: Android File Installer Android File Installer is a simple file manager that is well designed and straight forward to use. This app can access remote folders on your computer to install APK files and also update apps directly from your SD card. |

---

Android File Installer Download Android App of the Day: Install This APK to Your Device Android Install This APK to Your Device allows you to easily download APK files. It detects when you have installed the APK and will display other files on your SD card that are not APK files. Android App of the Day: Calculator: A new and superior calculator for Android. The new user friendly interface allows you to insert up to 10 items in simple fields. Just add up to 12 items and then press calculate and the real result appears on the screen. Android App of the Day: Espresso Calculator ESPERTO makes life easy when calculating. This app includes a lot of features. You can easily select the units you prefer, you can save the result to the SD card, the result is viewed on the screen or you can use it as a text file in your document viewer.Q: Google Apps Script: How to add a reference to an (e.g.) WebService from the trigger function itself? I am not able to use a WebService function from the trigger function itself.

```
function doGet(e) { var url = ""; var ws = new  
WebService("xxxx:Google:xxxxxxx", "xxxx");  
ws.methods = "xxxx"; //ws.create(url, response) // this  
works ws.create(response.response, response); // this  
doesn't. return
```

```
ContentService.createTextOutput("Success"); } The  
error is as follows: "TypeError: Cannot call method  
"create" of undefined. (line 6, file "Code")" A: The  
correct call is as follows: ws.create(url, {}, "POST");  
Trained in the art of mentalism, magician, inventor,  
and bestselling author Ricky Jay has been entertaining
