

Golf Club: Wasteland is a gorgeous, unique golf game set in a world ravaged by a global cataclysm. Beautiful is the first word I'd use to describe the world you find yourself in and the game is artfully crafted around the aesthetic. The game features a wide open world, an infinite number of unique courses, an in-depth golfing experience, and, most importantly, a new gameplay structure that encourages you to experiment and play off course. Key Features: • A Beautiful, Unique Golf Experience - Relive classic golf courses from around the world in a post-apocalyptic setting. Experience the game from a completely new perspective and never look at golf the same way again. • New Gameplay Structure - Play how YOU want to play by customizing your character, golfers, clubs, yardage, and other world assets. This is the first golf game with interchangeable assets. • Open World - Travel around a beautiful open world in a 4x4, complete with its own soundtrack and sandstorms. • Endless Gameplay - Use a single save file and you can play golf as your character ages, climbs in the golf ratings, picks up new clubs, and more. • Hundreds of New Golfers - From everyday golfers looking for a game to play, to golf legends such as Nicklaus, Palmer, Woods, and Player, Golf Club: Wasteland has them all! • Over 20 Unique Courses - In a world ravaged by a global cataclysm, discover stunning, original, beautiful golf courses that will take you on an unforgettable golfing journey. • 16 Different Styles - Play a variety of golf courses from all different styles such as Links, Old, Desert, and Others. • Multiplayer - Online and local multiplayer games are supported. Play up to 4 players on the same machine in both online and local modes with full options for leaderboards, replays, and more! What does it take to Unlock the Secret Chamber? HERE is your THUMB-THUMP. Purpose: More features? NO. Less features? NO. In all things, Simplicity. THUMB-THUMP is a rhythm-only, one-player game created with "a little bit of everything". In TOAST PUZZLE-WORLD, there is no Player vs Player, no Leaderboard, no Competition, etc. THUMB-THUMP offers the typical slow-burn-for-mastery-development-not-winning-the-game variety of games, but few if any of the other games in the genre, offer the degree of simple UI that THUMB-THUMP has. I would be very proud if THUMB-THUMP was the only game in the genre that could arouse enough desire in an otherwise healthy gamer to put in an hour of constant motion, without lagging, for as long as the game can keep going. How does it play? It plays just like TOAST PUZZLE-WORLD with two exceptions: There is a question-and-answer session where YOU communicate with the Source of Eternity: "How do I play it?", "What is it all about?", "What do I do?", "What do I need to do?", "How do I know I have done the right thing?", "Where do I go?", and finally: "What will I find?" Simplicity: No menu bar, no items that must be clicked, no buttons for important actions, THUMB-THUMP will let YOU do the same thing over and over with a single keypress: Press to start, Press to pause, Press to restart, Hold to learn an added keystroke, Mouse over to force a keypress. When mouse over, you get a slow "timed keyboard". If you want to do something more complex, use your mouse, as you would in any other situation. Some people see the beauty of the world around them and want to destroy it, while others seek only to enjoy it. Then there are those who want only to be told how good the world is, without having to do anything. Heroes come in all shapes and sizes, but no matter what they look like, they all wear their hearts on their sleeves. What's new in Olaguna Chronicles:

Jake Muller Developer, Mixmaxi Jake Muller is the founder of Mixmaxi Inc. a digital media and trade publishing company. Mitchell Bruno Developer and Editor Mitchell Bruno is the director of development at Nostalgia Hockey where he is responsible for the latest revamp of the game's codebase and support for the 2011 PlayStation 3 update. He is a die-hard Chicago Cubs fan. Playing the new game in a different corner of the world is always satisfying because the environment changes. The objects look utterly different and there's a brand new smell in the air. It's fun to see this type of game layout and graphics craftsmanship from a brand new studio especially in the genre. The game's map I love the concept of the way the game's map is set up with information panels displaying locations of the different locations shown. It provides a heads up display that can help you prioritize your movement when interacting with other game elements. Overall, the location viewing panels on the map appear to be a very good use of the PS Vita's new 3D graphics which are different than traditional 2D graphics. The map isn't as large as those seen in most commercial games but don't be put off by that because this type of environment lends itself more to single player. It also looks neat because you can see what little hills, lakes, mountains and forests the game actually has. It evokes the sense of a true town that would previously have been more apparent if it were on a larger scale and more graphic heavy. If only everyone had a PS Vita There isn't really a thing to dislike about this game. It looks great, it's fun to play, and most importantly, it showcases a lot of potential in a brand new studio. If only everyone had a PlayStation Vita. What I did not like Let me reveal what didn't fit my personal grade for this game. I only have a PS Vita and I don't play many games on it and this is the only one that I've reviewed on it. It could be due to limited experience or what it is I didn't find appealing. Corona Simulator is currently available for the PS Vita. This game has the potential to be a great experience and that's all there's to it but there's not a strong enough incentive to start playing it. The game's opening minute or so did not
