Autumn NetSpy

Autumn NetSpy is a program for Windows to program a log of systems in computer networks. You can use it, to supervise the time of connection to of the Internet, make a log of the time of connection/disconnection of computer systems from a network, obtain information about computer systems in a network, monitor data transmissions in network. This program is an extension of the functions of the system utility NetStat. The built-in Stat program is used to display network connection information, whereas Auton NetSpy help to obtain more information about network connection. Autumn NetSpy Features: Network statistics Functional availability of the Internet Displays a map of the distribution of computer systems in a network Displays information about the Internet connections (redirects to such a Web-site or data transmitted) Shows the time of log-in/log-out of a computer system from a network Shows the time of connection to the Web-site Monitoring Manually, or periodically, checks the Internet access to a computer Appointment of a computer system in a network Combination of a network address with IP-address of a computer View IP-addresses of log-in time (optional) Using a domain name Sending the IP-address of computer systems to the local computer Has a function of creating a map of distribution of computer systems in a network It can receive the list of interested systems and show a map of information on their distribution in networks Shows the date/time of connected to the Internet Has a log function Deactivation of computer systems from a network Shows information about the connected to the Internet System usage Statistics on the Internet connections Interfaces Configuration The program has a built-in help function, which is activated by double-clicking on a button Autumn NetSpy License: Autumn NetSpy is free software, released under the GNU General Public License. Autumn NetSpy Download Options: Autumn NetSpy is available online on SourceForge.net as a zip archive. (Autumn NetSpy Direct URL: Thats a good point, Nethro, but until now there is no one way to do it. No doubt a tutorial is on the way, but for the mean time.. It is very bad form to spy on others using b7e8fdf5c8

Autumn NetSpy Registration Code

Autumn NetSpy is an affordable, easy-to-use network detection and time-tracking application. It periodically checks your PC, the Internet, and any other network to see if someone has hacked into it or turned it on and off. If it finds a system on the Internet, it tracks the exact time and location of that system. With Autumn NetSpy, you can keep track of your incoming e-mail, download updates from the Internet, or even listen to music over the Internet. Autumn NetSpy Features: * Network Detection: This nifty program checks your PC and the Internet for computers that are on, and when they are off, and notifies you to any changes. It can also keep a log of the computer's Internet activity. * Spoofing: Access to DNS and SMTP servers can be allowed or denied to rogue computers from a host. * Timing: A 30 second countdown timer will be displayed and notifies when the host(s) are turned on, off, or when they are booting, shutting down, or lost in the Internet. * Malware Scan: Check for viruses with a free virus scan scan. * Logs: A log of your internet activity can be printed. * Interface: Detailed reports can be printed and emailed. * DNS: A simple interface to allow network activity tracking. * More advanced features will be added in the future. Requirements: * Windows 2000/XP/Vista/7 (32/64-bit) * Internet Explorer 4.0 and above AutumnNetSpy.zip (41.7 KB) Autumn.zip (251.3 KB) The application is part of the Trojan.Win32.SlszApp - threat, this malicious application is designed to download and install other malicious applications. The analysis of the application showed that it spreads by use of social engineering tactics. The main purpose of this application is to download other malicious applications and install them. It was detected by the security experts that the infected machine can also download and install keystroke logging software. It was detected that the threat uses the Win32/R.Trojan.Win32.Agent.c virus as its component. File properties: File version: 11.00 File size: 59.96 Kb The application was first detected on: 04/05/2014 MD5: 1cc8a91c
